RE: SENIOR MACHINE LEARNING ENGINEER

Dear Hiring Manager,

I am writing to express my interest in the Senior Machine Learning Engineer position at Anthropic. With five years of hands-on experience building production ML systems in Python and a track record of shipping models that directly improve user outcomes, I am confident I can contribute meaningfully from day one.

At TechStart Inc., I led the end-to-end delivery of a real-time recommendation engine that increased click-through rates by 23% within three months of deployment. The system processes over two million events per day using PyTorch, with a custom feature store backed by Redis and PostgreSQL.

What draws me to Anthropic is your commitment to safety-first AI development. Your recent work on constitutional AI aligns directly with research I have been pursuing independently, and I would welcome the chance to bring that perspective to a team that treats rigour as a first-class concern.

I look forward to discussing how my experience can support Anthropic's mission. Thank you for your time and consideration.

Jane Smith
